

**Precision Health for
Peak Performance.**

You optimise your Business. Your Team. Your Return on every Investment.

You travel frequently.
Sleep inconsistently.
Have no time to be unwell.

You've built your career.
Your company.
Your family.

Now, optimise your return on health.

Biopeak - your health manager. Keeping you ahead of what's coming.
Mentally agile. Physically ready. Recovering faster than your schedule demands.
We optimise your healthspan, More years at your peak.

VALIDATION : 1 YEAR ON

The Body Hides Diseases

By the time a disease is diagnosable, it has usually been building for years. Biopeak looks at health at the level where it actually begins — inside cells and biological pathways — where imbalances are still fixable, before they become a diagnosable condition.

Fat tissue & metabolism**61%**

had a moderate to severe imbalance

Heart & blood vessels**86%**

showed some level of impact

Gut health & immunity**82%**

showed some level of impact

Blood sugar & aging markers**99%**

carried some related stress on the body

Oxidative stress (energy production within cells)**58%**

showed some level of impact

Across the cohort studied, these five axes show the most clinically significant perturbation.

Predictive Insights from Our Digital Twin.

Age-related cerebral volume loss

Brain volume changes little before 40, then declines faster through the 50s and 60s.

Knee osteoarthritis (bilateral)

Cartilage in both knees wears down sharply after 50, reducing mobility, fitness and stamina.

Small-vessel ischemic changes

Metabolic stress damages tiny brain vessels in 4 in 10 people by 43, and 7 in 10 by their 60s.

Prostatomegaly

The prostate enlarges in more than half of men over 50, often before symptoms appear.

Biopeak approach : 4Ps of peak health

PREDICTIVE

We identify risks before they surface by decoding your molecular, genetic and lifestyle data, giving you the power to stay ahead of illness with confidence.

PREVENTIVE

We help you act early with a health strategy designed to keep you ahead of illness.

PERSONALISED

We tailor every health plan to your unique biology, lifestyle and goals.

PRECISE

By combining cutting-edge diagnostics with advanced analytics we turn complex data into targeted action.

Path To Bio-Peak.

DETECT

Understand the full health picture.

OPTIMISE

Turn findings into actionable insights with a personalised plan.

REGENERATE

Build long term health reserve and vitality.

DETECT early risks before they surface as symptoms.

Biopeak connects early signals across systems to show how your body is functioning and where risk may be building.

Take A Deeper Look at Your Health

Multi-omics diagnostics

1. Genetics and nutrigenomics
2. Metabolomics
3. Microbiome analysis
4. Comprehensive blood biomarkers
5. Cortisol and stress rhythm

Structural and functional health

1. DEXA scanning
2. CT calcium scoring
3. Full-body MRI
4. Digital imaging twin
5. Functional movement screening
6. Comprehensive Ultrasound

Neurocognitive health

1. Reducing cognitive load
2. Improving threat response
3. Breathing mechanics assessment

BIOLOGICAL PATHWAYS

Connected for context.

500+

HEALTH CONDITIONS

Risks and early signals.

Depending on your clinical assessment, your doctor may recommend additional specialised tests, such as VO₂ Max, corticosteroid, NAD test, Omega-3 Panel, Somfit to further personalise your care plan.

Turning data into deep personalised insights & plan to **OPTIMISE** your health.

An expert team turns every finding into one clear Personal Plan, built around your priorities and daily life, with a health coach guiding you at every step.

Your Personal Plan will Cover :

1

PERSONAL PLAN

One integrated plan with clear guidance at every step.

12

MONTH OUTCOME DRIVEN

We co-own your health journey at every step.

- **NUTRITION**

Create a food plan matched to your metabolism and gut health.

- **SUPPLEMENTATION**

Recommend supplements only where clinically indicated and review them regularly.

- **MOVEMENT**

Exercise calibrated to capacity, strength and mobility.

- **HEALTH OPTIMISATION THERAPIES**

Use precise therapies based on your data to achieve your health goal.

- **MONITOR & OPTIMISE**

Retest after 3 - 4 months to measure progress and track outcomes.

We co-own your health with a multidisciplinary care team

Board-Certified Clinicians

Applies clinical judgment to identify what matters, when to act, and how to prioritize.

Genetic Experts & Systems Biologists

Integrate genes, metabolites, microbiome, and biomarkers into one connected health system.

Physiotherapists & Performance Specialists

Translate biology into movement, recovery, and measurable performance gains.

Nutritionists & Lifestyle Specialists

Design personalized nutrition and lifestyle protocols tailored to your health goals.

Behavioral & Stress Therapists

Optimize stress resilience, cognitive performance, breathing mechanics, and sleep quality.

Every recommendation passes through this integrated team before it reaches you.

REGENERATE at the cellular level for long-term vitality, resilience & performance.

We use precision therapies to support cellular regeneration, recovery and adaptation to build long-term vitality, only when your assessment shows a clear need.

Targeted Regenerative Support

- **Cold Plunge**

Builds nervous-system resilience, supports recovery and helps manage inflammation through precisely dosed cold exposure.

- **Endurance Pool**

Builds cardiovascular capacity and aerobic endurance while reducing unnecessary load on the joints.

- **Vitality Pool**

Supports rehabilitation, circulation and active recovery through joint-safe movement, and hydrostatic pressure.

- **Infrared Sauna**

Supports circulation, deep-tissue recovery, and nervous-system downregulation through calibrated infrared heat.

- **Contrast Therapy**

Alternates heat and cold to improve circulation, accelerate recovery, manage inflammation and strengthen autonomic resilience.

- **CellGym / IHHT**

Supports mitochondrial conditioning and cellular adaptability through controlled cycles of reduced and normal oxygen.

What is Monitored?

The protocol matters more than the process. Every therapy is screened, timed and calibrated for you and your body response.

PROTOCOL

Therapy's duration and intensity based on your body response.

- **Gut Healing Therapy**

Personalised protocols designed to support digestion, nutrient absorption and microbiome balance.

- **Lymphatic Drainage Therapy**

Gentle manual techniques that support lymphatic flow, reduce fluid build-up and aid recovery.

- **Biodensity**

DEXA-guided osteogenic loading that delivers a precise bone-building stimulus in a guided 10–15-minute session, supporting bone density and musculoskeletal strength.

- **Taoist Therapy**

An ancient abdominal therapy designed to release deep-seated tension, improve energy flow and restore balance in the body's core systems.

- **Hyperbaric Oxygen Therapy (Hbot)**

Medically supervised sessions using pure oxygen under pressure to improve tissue oxygenation and support cellular repair, inflammation management and recovery.

- **Altitude Trainer**

Calibrated low-oxygen conditioning that simulates high-altitude environments to improve oxygen efficiency, cardiovascular adaptation and endurance.

BEHAVIOURS

Nutrition, movement, sleep and adherence.

OUTCOMES

Energy, cognition, recovery and capacity.

A New Standard in Longevity Science

**CONVENTIONAL
CARE**

VS

BIOPEAK

FEATURE	CONVENTIONAL CARE	BIOPEAK
Focus	Treats diagnosed disease	Detects dysfunction and risk early
Timing	Responds after symptoms	Acts before symptoms become disease
Assessment	Generalised and isolated	Multi-system and biology-specific
Data	Broad population averages	Indian data and your personal baseline
Intervention	Primarily symptom-led	Personalised and root-cause focused
Health model	Conditions viewed separately	Systems interpreted together
Continuity	Ends at the appointment	Monitored and adapted over time
Team	Expertise limited to one area	Integrated expertise across systems

The difference is when care begins, what it connects and whether support continues.

Your Biopeak Journey, Step By Step.

STEP 1

Biopeak App:

1. Complete a health questionnaire covering your history, goals and priorities.
2. Access the app where your longitudinal health data is built.
3. Use the built-in AI to get answers to your health queries.

STEP 2

Initial Consultation: Discuss your goals, health history and concerns with a doctor and a health coach .

60 minutes (in person / online)

STEP 3

Full Biological Assessment:

1. **At-Home Testing:** Blood, genetics, gut microbiome, metabolite and cortisol.
2. **Assessment Day at Biopeak:** DEXA, ultrasound, breathing, stress, musculoskeletal and movement assessments.
3. **Advanced Imaging at a Partner Hospital:** Full-body MRI, ECG and prescribed cardiac or imaging assessments.

STEP 4

Expert Review: Our multidisciplinary team connects the findings and maps your complete health data.

STEP 5

Intervention Phase: Your personalised plan is defined with Nutrition & Supplementation guidelines, movement recommendations and Breathing & Stress-management Protocols.

STEP 6

Regular Check-ins: Review adherence, progress and concerns with your health manager at regular intervals.

STEP 7

Retest Key Markers: Measure changes, review outcomes and understand how your body is responding.

STEP 8

Recalibration: Refine your personalised plan based on your progress and updated health data.

STEP 9

Continuous support : Ongoing guidance and optimisation through Month 12 as your health and needs evolve.

Personalised Programmes Built for Where **You Are** & Where **You Want to Be.**

CXO EDGE

An annual programme combining comprehensive diagnostics, expert review and a personalised plan, with deeper tracking of stress, cortisol, recovery and performance.

Best for: Founders, CXOs and senior leaders.

ELITE LONGEVITY

A year-long programme combining assessment, quarterly reviews, continuous monitoring and precision therapies prescribed around your needs.

Best for: Long-term health optimisation and measurable progress.

WOMEN'S HEALTH

A personalised programme designed around female biology, hormonal health and changing needs across life stages.

Best for: Women seeking targeted support through hormonal and life-stage transitions.

Biopeak difference in Words of Clients.

“ Biopeak uncovered issues I never expected and built a personalised plan around them. I now feel stronger, more energetic and better prepared to protect my health as I age.

Vikram Sinha
Entrepreneur”

“ Biopeak connected what my specialists couldn't. My dizziness eased, travel became easier, and I felt more confident at work and in life. The team stayed closely involved throughout.

Sourav Gupta,
Technology”

“ I've been with Biopeak for three months, and the experience has been genuinely different. The breadth of testing, detailed reports and outcome-driven approach have made the journey both insightful and valuable.

Alex Yousuf
Technology Leader at an MNC”

“ I came to Biopeak wanting to understand and optimise how my body functions. The depth of testing, professionalism and state-of-the-art approach stood out immediately. It helped me take charge of my health before small issues had the chance to become bigger ones.

Aayush Kothari
Product Consultant & Athlete”
